Re: Hurricane Harvey – Update No. 1
Force Majeure

Dear Valued Customer,

Formosa Plastics Corporation, Texas – Point Comfort site (“Formosa”) experienced no equipment damage due to wind and rain caused by Hurricane Harvey that would prevent a restart; this is based on a current preliminary assessment. Plant personal are in the process of returning to work, subject to their ability to do so safely, as our primary focus is the safety of our employees.

A major supply partner of raw material, propylene, to the complex has declared force majeure. In addition, transportation partners are annulling shipments in addition to implementing embargos destined to Houston and the surrounding areas.

As a result, pursuant to Section 4 of Formosa Terms and Conditions of Sales, Formosa is declaring Excuse of Performance (Force Majeure) on all of its Formolene[®] grades of Polypropylene and Polyethylene for the months of August and September 2017. Formosa will provide further information on supply quantities; however, it is anticipated that this information will not be available for several days as we continue to assess the full impact of the hurricane and our ability to supply products.

You are encouraged to use the “My Formosa” E-Business Service Center at www.fpcusa.com for commercial information including the location of railcar shipments. Future updates related to this event will be available on the Formosa Website, tagged as SPECIAL NOTICE: HURRICANE HARVEY, <http://www.fpcusa.com/myformosa/customer/index.html>.

We understand the burden that this will put on your company. Formosa is making every effort to return back to normal production as quickly as possible. Your sales representative will keep you apprised of the status of this issue and work with you on your specific product needs in an effort to minimize the impact of this supply disruption.

Sincerely,

Ken Mounger
Vice President/General Manger
Polyolefins Division
